ANiU Corporate Wellness Programs

Get a healthy return on your investment

Our Corporate Wellness Programs can have a range of benefits for your company, both in quantifiable figures and intangible results. For the company as a whole, one of the most significant benefits is the reduction in overall company costs. It is hard to quantify the impact of decreased stress and improved morale, productivity and work performance on your bottom line. However, the reduction in sick leave, absenteeism and lower healthcare costs contribute to a sizable reduction in overall costs.

At ANiU Salon-Spa-Yoga, we are devoted to the wellness of our clients and partners. We strive to detoxify and de-stress not only by providing a refuge for body and mind, but in creating wellness programs that make it easier to develop healthy lifestyles.

ANiU has developed a Corporate Program to enable you to reward achievement, express gratitude and provide renewal to those people who contribute to your business success.
